

[2024/3/5]

[insert Delta entity name and address] ("Delta")

To whom it may concern,

From time to time, Texas Instruments Incorporated ("TI") may issue a Product Change Notification ("PCN") after a product releases to market. TI emphasizes continual improvement strategies, and as a result, TI may need to modify, update or discontinue the product or manufacturing process. TI complies with the requirements for timely notification in J-STD-046. Consistent with this industry standard, customers are notified of major changes which affect the form, fit or function, or adversely affect quality or reliability of a product. This has been TI's historical practice for products purchased in the past by Delta through distribution channels.

Also note that all TI products, including TI products subject to a PCN, undergo the TI qualification process. More information about TI's qualification process, please see <http://www.ti.com/support-quality/reliability/reliability-home.html>

This letter confirms that a TI product subject to a PCN is still covered by TI's applicable warranty at <http://www.ti.com/legal/terms-of-sale.html>. The changed material (the TI product subject to a PCN) will be governed by the relevant datasheet specifications referenced in the TI warranty. This warranty applies to products previously purchased by Delta through distribution and will continue to apply to products purchased directly by Delta from TI.

Sincerely,
[insert name]
